"FLY-THRUS, ASSOCIATIVE DIMENSIONING, GLOBAL EDITING... ALL I KNEW WAS THIS HAD BETTER WORK."

Our search for CAD software was intense. Being a small architectural firm, we *couldn't* afford to make a mistake.

By Architects, For Architects

Fortunately, we discovered DataCAD,* a versatile, easy to learn, easy to use PC-based design and drafting tool. DataCAD was developed *by* architects, *for* architects, (unlike the "name brand" we almost bought).

Works Like An Architect

DataCAD allows us to do 2-D and 3-D designs faster and more easily than we ever thought possible. Create with built-in wall, door, window and column commands. Easy editing, symbol libraries and "live views" are also standard.

We now spend more time designing, while we've reduced our costs. And in this tough market, we can use all the help we can get.

Even The Price Is Easy

Not only was DataCAD simple to learn (and a pleasure to use), even the price was easy. We got everything we needed in one basic package with *no* costly add-ons. If you could design CAD software for your firm, this is what you'd invent. Ask for a live demonstration and see for yourself. You've got nothing to lose except the drudgery.

Render option available.
