

# DataCAD<sup>®</sup>. The Designer's Powertool.

All eyes are now riveted on the latest advancement in the CAD revolution. DataCAD is an intuitive design program built for speed, power and flexibility...the most important tools for design-oriented professionals.

Created by architects, DataCAD is a major improvement over other CAD programs. It delivers the ultimate in visual impact and technical precision, with 3-D modeling, on-line databasing and numerous built-ins

that lesser programs offer only as add-on luxuries. No wonder this easy-to-use, integrated system has been selected by the American Institute of Architects PSD as the design program of choice.

Call us today. Then turn on the strongest powertool for dynamic design.
